

ABSTRACT

There is provided a weather strip for a car which comprises a grip and a seal part. The grip is U-shaped in cross section and is attached to a flange. The grip comprises a holder part and an insert which is embedded in the holder part. The seal part performs a sealing function. The holder part is made of olefinic rubber or thermoplastic resin, and the insert is made of olefinic thermoplastic elastomer or material comprising filler such as talc or glass fiber.
